Concerns: Technical Program “Call for Workshop Ideas”

Dear IYNC Board Members, National Representatives and Participants,

We are brainstorming ideas of interactive workshop concepts and themes for the IYNC2020! To help us make these workshops a success, we are looking forward to getting your input.

Please suggest to us any topic you are interested in by filling out the template provided here before March 31st, 2019.

The workshop proposals can cover a large variety of themes, from technical through social to economic aspects of nuclear science and technology. Workshops are meant to be interactive and can be designed for a small or a broad audience. Workshop sessions will be scheduled for either 2 or 3 hours, depending on the subject and requests of the organizer.

The workshop organizers may be Young Generation or senior professionals from various backgrounds, active inside or outside the nuclear industry. For more information and to participate, please visit: <https://iync2020.org/index.php/workshops/>

Please fill out the corresponding Google Form with your ideas **by March 31th**.

If you have any questions, please feel free to contact us. We are looking forward to receiving your original ideas

Thank you for your creative input and best regards,

Valentina Angelici Avincola, Dr
